Fabric, London

Over the years, Isonoe has established a good working relationship with Fabric. The photos below show a couple of examples of work carried out.

Before installing Isonoe Isolation Feet, Fabric's head engineer, Sanj Bhardwaj, needed concrete evidence that the product was effective. Isonoe went into the venue with accelerometers, comparing waterfall plots and FFTs between turntables fitted with the Isonoe products and those not. The difference was as much as 20dB attenuation in the sub-100Hz region.

Whilst onsite with our test equipment, Isonoe were able to assist in checking the calibration and performance of Fabric's turntables:
